👨‍💼 Professional Profile

Junior fullstack developer with experience in **React** and **Spring Boot**, specialized in building web applications and REST APIs. My technical background, combined with a career in digital marketing, has helped me develop key skills such as communication, autonomy, and user-centered creative thinking.

Currently focused on consolidating my career in software development, with several personal projects in production where I apply best practices, layered architecture, and modern tools. I'm eager to join dynamic teams where I can contribute from day one, continue learning, and grow professionally.

🛠️ Technologies and Skills

- **Frontend:** HTML, CSS, JavaScript, React, Tailwind, Material UI, Sass
- **Backend:** Java, Spring Boot, JPA, Hibernate
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, Postman, Docker
- **Languages:** English B1 – Writing, Listening, Reading: Advanced | Speaking: Intermediate

---

🚀 Highlighted Projects

- Alumnado (Spring Boot + React) | GitHub | Demo
  Student and teacher CRUD with JWT authentication and layered architecture (JPA + business logic).
- Sneaker Market (React) | GitHub | Demo
  E-commerce with interactive catalog, filters, and responsive design using Tailwind.
- Movie Landia (JavaScript) | GitHub | Demo
  Movie search app consuming an external API with real-time results.
